Technical Skills

Type Script • JavaScript • React • Redux • figma • SCSS • HTML5 • CSS3 • Bootstrap • Glt • GitHub • Webpack

Projects

Chess Game:

Created a web single page application for playing chess.
Used to create Type Script and React.
Site: <https://poetic-sunshine-10ee23.netlify.app/>
Code link: <https://github.com/WWWolverine/chess>

Notes:

I created a single page application with a note system using Type Script and React, also made pagination and added a LocalStorage data storage system.
Site: <https://dashing-scone-5bf372.netlify.app/>
Link to code: <https://github.com/WWWolverine/todos>

Clock

Created single page application Clock,
Used React and Typescript(props, types, state, arrow function, promise) and also used api.
Code link: <https://github.com/WWWolverine/Clock>
Site: <https://dazzling-frangipane-8fb859.netlify.app/>

Experience

Frontend Developer

January 2022 - Present (8 months)

I know how to adaptively develop a single page application site.
I work with React and TypeScript.
I have experience with webpack. I worked with API through Axios. I upload all projects to GitHub. I have studied and tried Figma. I also worked a little with Redux and SCSS, but they didn't come in handy in my projects. I also worked with CSS libraries: Bootstrap and Material UI. I have also worked with hosting sites, in particular Netlify.

Sales Manager

Sep 2021 - Apr 2022 (8 months)

Education

Moscow International University of Business and Information Technologies
incomplete higher, jurisprudence
Sep 2021 - May 2022
